

# Engage Your Users with a Configurable Mobile App

LifeOmic's proven **Configurable Mobile App Toolkit**, downloaded over 5M times, integrates and automates engagement pathways to keep your patients/members/users on track to improve understanding, efficacy and efficiency of your unique solution.

## All-in-one Design

Don't get rid of what's working now. LifeOmic can work with your developers for native customizations and co-create to integrate for success.

### Customized to Your Unique Needs

LifeOmic's app can be white labeled with your branding and the modular design enables it to be configured to meet your unique needs.

### Built-in Audio/Visual Access

LifeOmic's configurable mobile app has built in audio/video access (individual and group) enabling telehealth, support groups or education delivery.

### Comprehensive Educational Library

Access LifeOmic's robust educational content library, with the ability to quickly and easily create your own custom programs.

### Robust Analytics & Tracking

The app integrates with our precision health cloud in the full spectrum of critical data sets including EMR, wearables, biometric, surveys, genomic sequencing and biomarkers.

**LifeOmic** is a healthcare technology company that works with health care providers, researchers, and health-focused enterprises to aggregate and utilize health data to improve patient outcomes and provide valuable, actionable insights.
