

# Improve Cancer Outcomes with LifeOmic Oncology

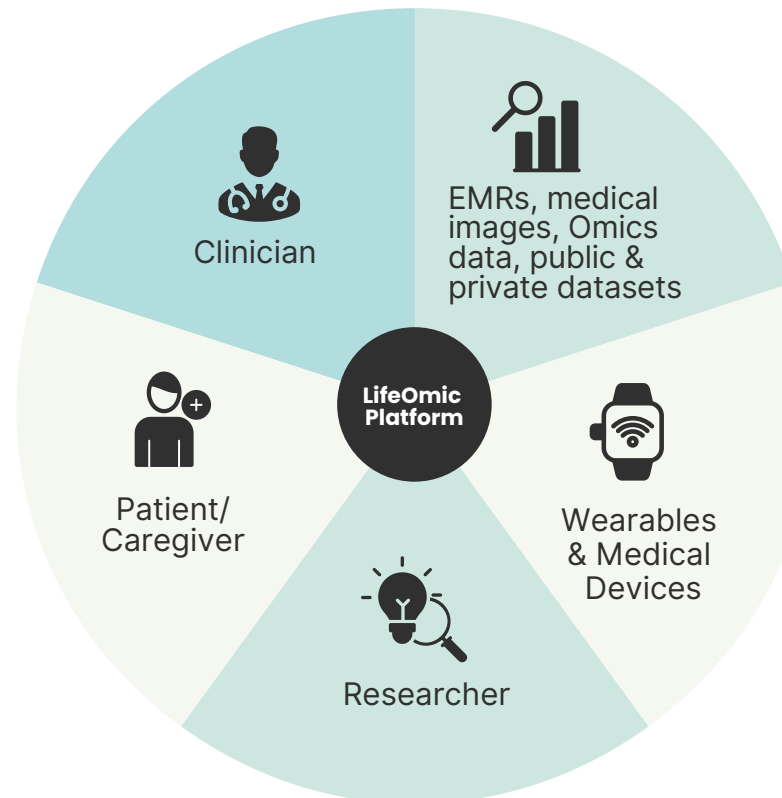

LifeOmic Oncology enables clinicians to design individualized patient treatment plans by exploring data from EHRs, genetic tests, clinical trial databases, wearable devices and patient-reported outcomes.

## Powering Precision Health

Unlike most precision medicine solutions, LifeOmic Oncology empowers clinicians to broaden the practice of precision health with automated patient engagement programs delivered in a mobile app to improve health outcomes.

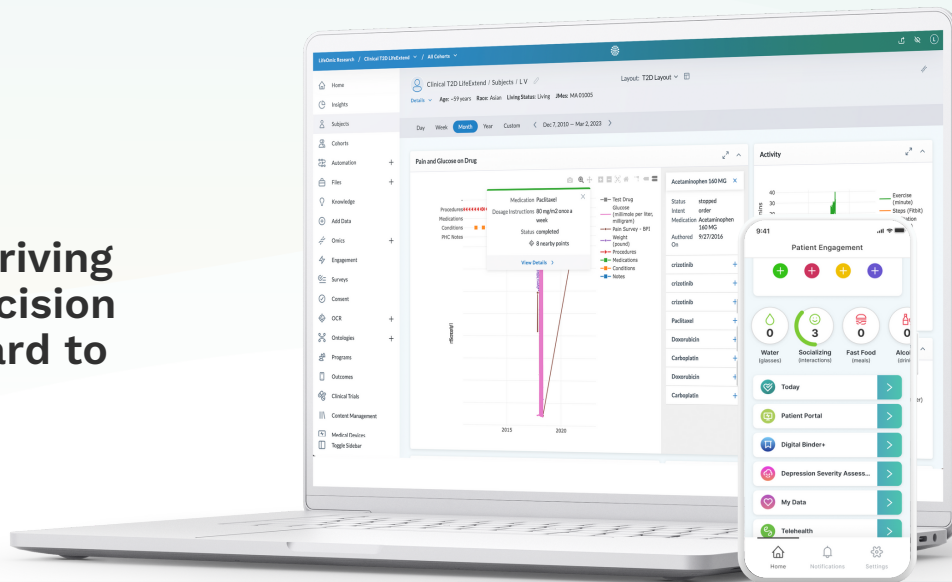

## Why LifeOmic Oncology

- Improve patient outcomes by efficiently matching more patients to targeted treatments and clinical trials
- Secure, customizable, easy-to-use interface for the whole care team
- Engage patients directly with interactive tools to inform and empower them and their family members
- Infinitely scalable comprehensive patient data storage and integration

**"We are committed to driving the most innovative precision health technology forward to solve healthcare's most complex challenges."**

## Genomic Data Harmonization & Annotation

Understand the functional impact of cancer mutations with public/private databases at your fingertips (dbSNP, ClinVar, gnomAD, in-silico predictors, JAX, TCGA)

## Clinical Trial Matching

Built on data from clinicaltrials.gov, search for personalized clinical trial options for your patient or easily identify and recruit patients to fill trials in your network.

## Molecular Tumor Board

Moderate molecular tumor boards and deliver personalized treatment advice to other oncologists within your institution.

## Patient Mobile App

Leverage our configurable mobile app to deliver custom educational content and digital treatment binders, collect e-consent, surveys and patient reported outcomes and integrate wearables.

## EMR Integrations

Overlay your sequencing reports with clinical data from your EMR and push recommendations and notes back into your EMR-all in one place.

## Secure Platform

HIPAA compliant, HITRUST CSF Certified, GDPR compliant and securely collects data and converts to FHIR standards.

## About LifeOmic

Our cutting-edge technology helps power precision health for more than 5 million people. Our mission is to equip providers, researchers, and health-focused enterprises in their pursuit of precision health care. The LifeOmic Platform forms the technology backbone for managing complex health data and building transformative products.
